INSTALLATION

WIRING DIAGRAM

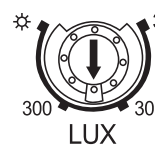

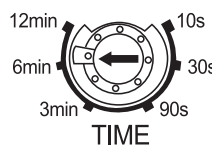

WIRING DIAGRAM WITH BYPASS SWITCH

TEST:

- Turn the TIME knob anti-clockwise to the minimum (10s). Turn the SENS knob clockwise to the maximum (+). Turn the LUX knob clockwise to the maximum. ☀
- When you switch on the power, the light will be on at once. And 10sec±3sec later the light will turn off.
- Turn LUX knob anti-clockwise to the minimum (3). If the ambient light is less than 3LUX (darkness), the sensor will work when it detects motion.

Note:

When testing in daylight, please turn LUX knob to ☀ position, otherwise the sensor will not work!

Warnings:

1. Make sure that the product is installed properly before connecting to electricity.
2. Do not cover the fitting.
3. Maintenance and installation should only be carried out by a professional electrician.
