Before installing the smart bulb, make sure you have a router which can access to the internet successfully, the WiFi router must switch to 2.4Ghz mode. Please turn on WiFi and Bluetooth on your phone or tablet.
Scan the QR code and download Smart Life App, install App and register an account.

A There are three methods to connect.

Default mode:
How to make the light blink rapidly?
1. Power on the bulb(>10s)
2. Power off(>2s)->Turn on(<1s)->off(>2s)->on(<1s)->off(>2s)->on (Wait for 5s).
3. Then the bulb will rapidly flash (On and off twice per second).
4. If not,please try again, go on step 2 as long as the bulb is quickly flashing.
   How to add the smart bulb in the app?
1. App installed devices connect to Wi-Fi and enable the bluetooth and location permissions.
2. When the bulb is in pairing status (quick flashing), click"+"on the top right corner of Smart Life App, tap in order'Add Manually->Lighting->Light Source (BLE+Wi-Fi).
3. Make sure the bulb is quick flashing. Choose the local WiFi and enter WiFi password, click 'Next', then add the bulb accordingly.
4. You can rename the device as you want and control it on the App.

AP mode:
Set App to pairing status, please choose 'AP mode' on the top right corner.
Follow the prompts:
1. Power on bulb(>10s)
2. Power off(>2s)->Turn on(<1s)->off(>2s)->on(<1s)->off(>2s)->on, after the flash is quickly flashing (Light on and off twice per second), then continue to, power off(>2s)->Turn on(<1s)->off(>2s)->on(<1s)->off(>2s)--> on (Wait for 5s).
3. Then the light is slowly flashing (Light on and off once per second).

Bluetooth connection:
1. Make sure your mobile phone/tablet has connected to a 2.4Ghz WiFi router and the device's bluetooth is enabled.
2. Make sure the bulb is flickering.
3. When you open the Smart Life App, the 'adding device window will pop up , add the device accordingly.
4. If the device adding window does not pop up, click the '+' on the top right corner of the App to add the device.
